### OUTCOME:

A case study was conducted for the 3rd-year class to carry out a landscape study at Sanket Nursery, Wakadi. The landscape visit was organized under the guidance of Ar. Dipeeka Arbatti and Ar. Sonali. The main objectives of the study were to introduce different types of plant materials, understand their growing conditions, water requirements, and sunlight needs. The students also aimed to study both indoor and outdoor plants and distinguish between ground covers, shrubs, small trees, and large trees.

During the landscape visit, the students had the opportunity to explore the diverse species of plants and shrubs available at Sanket Nursery. They gained knowledge about the various decorative plants suitable for landscape layouts, enabling them to understand how to create visually appealing and well-balanced outdoor spaces.

The case study successfully fulfilled all its objectives:

**Introduction to Plant Material:** The students were introduced to a wide range of plant materials, including different species of plants, shrubs, and decorative plants commonly used in landscape design.

**Growing Conditions and Water Requirements:** The students learned about the specific growing conditions required for each plant, such as soil type, moisture levels, and climate preferences. Understanding the water requirements for various plants was vital for creating sustainable and water-efficient landscape designs.

**Sunlight Needs:** The students gained insights into the sunlight requirements of different plants, which is crucial in determining their suitable placement within a landscape layout.

**Study of Indoor and Outdoor Plants:** The landscape study allowed the students to explore both indoor and outdoor plants, understanding how each type contributes to different design elements and atmospheres.

**Differentiation between Plant Types:** Through the study, the students became proficient in differentiating between ground covers, shrubs, small trees, and large trees. This knowledge would aid them in selecting and combining plants to create harmonious and visually appealing landscapes. To document their findings, the students prepared a comprehensive inventory of all the plants present in the nursery. The documentation was carefully organized in a spiral-bound format, ensuring easy access and reference for future design projects and studies.

Overall, the landscape study at Sanket Nursery proved to be a valuable learning experience for the 3rd-year students. The hands-on exposure to various plant materials and their characteristics equipped the students with essential knowledge and skills necessary for creating thoughtful and aesthetically pleasing landscape designs in their future careers as architects.
